Notes.

1. Self-portraits and portraits with multiple figures are not included. Data from Gordon (1974) not included because no figure was given for right side: it was not differentiated from frontal orientation.
2. Numbers are derived from reported proportions multiplied by sample size.

3. Data from ten Cate (2002). Numbers are estimated from figures in the original.
4. Numbers are averages of two raters.
5. Data from Uhrbrock (1973).
